## Who Should Attend?

This symposium is intended for eye care professionals, physicians and students interested in recent advances in the diagnosis and management of ocular disorders.

## Symposium Description

This one-day symposium will focus on current research and clinical advances in common ophthalmic conditions. Format and presentations are designed to engage the audience and speakers in open dialogue.

## Symposium Learning Objective

This symposium will inform the practicing ophthalmologist about current results of clinical trials applicable to their practices in the evaluation and management of common ocular diseases. It will highlight the especial population of the Bronx, and its unique characteristics of ocular disease. Research interests of the residents, faculty and students will be presented to update participants in translational medicine of value to their patients and practice. After attending this activity, participants will be able to:

- Help ophthalmologists in their thinking about which technique to use in glaucoma and cataract surgery
- Employ newer imaging modalities and software to help confirm clinical diagnoses of retinal and optic nerve disease
- Recognize the value of telemedicine in Ophthalmology
